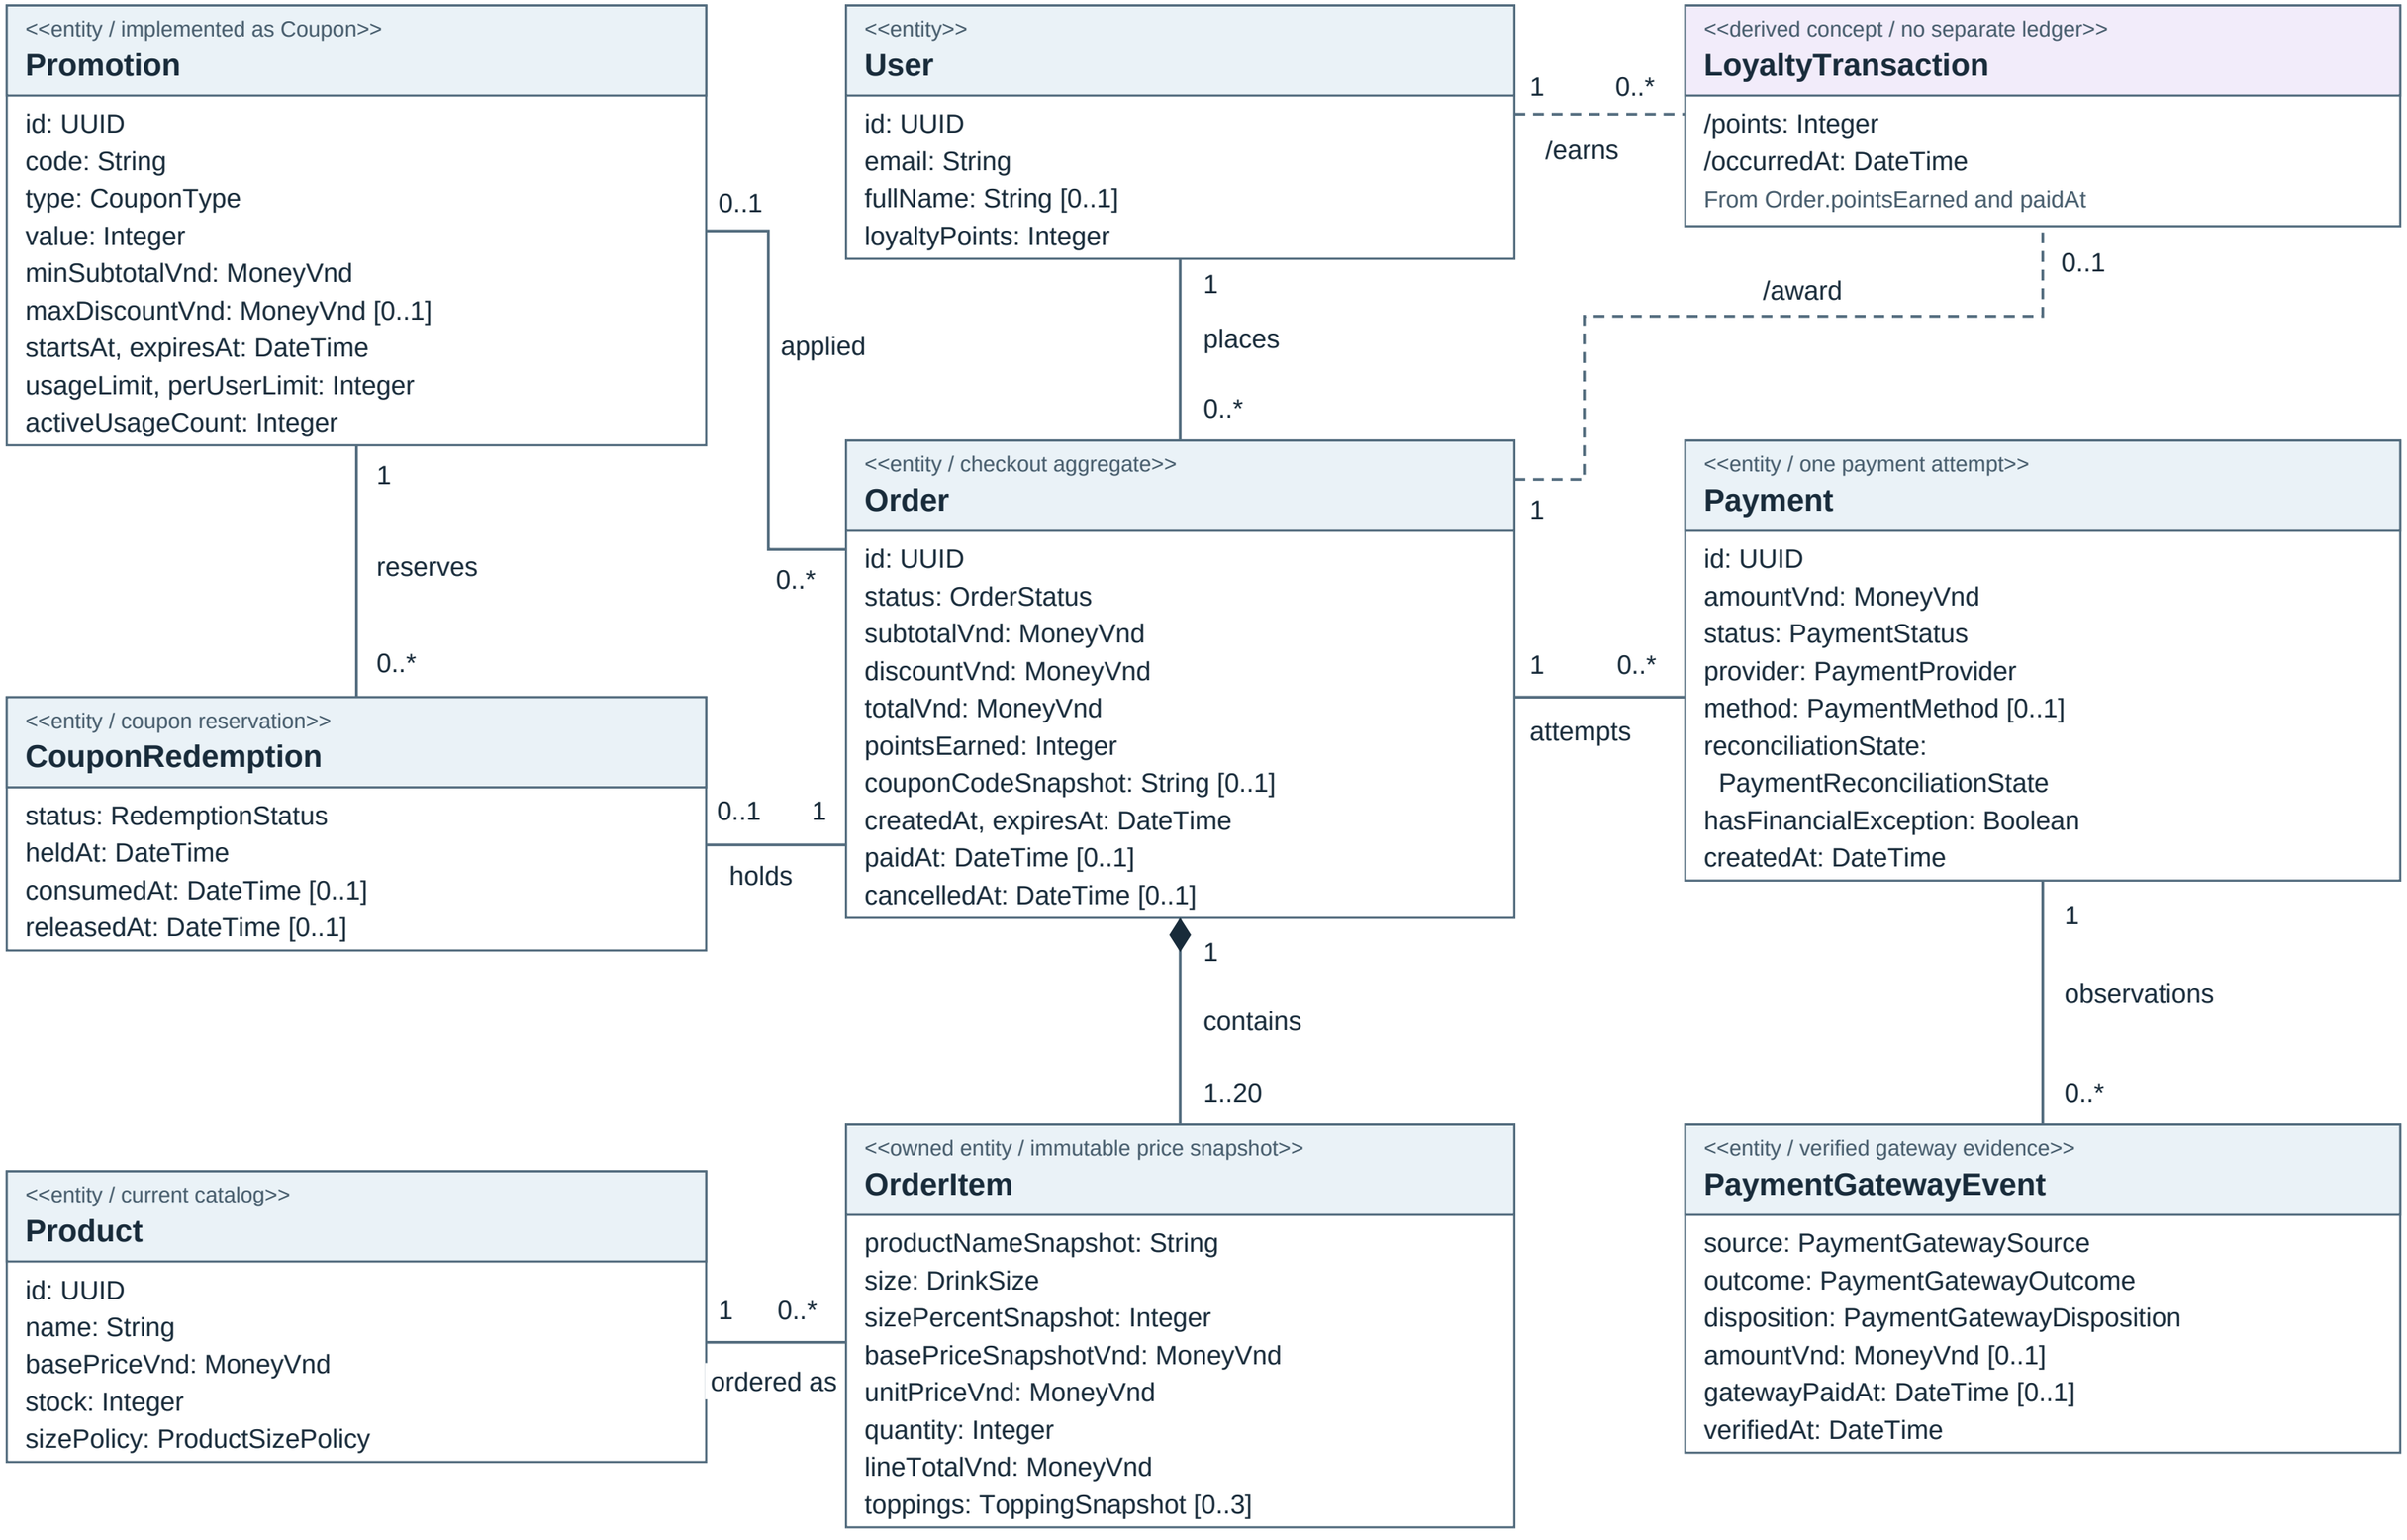
Domain class diagram

BrewLite | SCRUM-105 / A2-T2.3 | A1-final | DRAFT - pending review



UML: filled diamond = composition; dashed /association and /attribute = derived, not persisted separately.

MoneyVnd = non-negative integer VND. Multiplicities describe all history; guards limit active orders and accepted payments.

Domain types and enums

BrewLite | SCRUM-105 / A2-T2.3 | A1-final | DRAFT - pending review

<<enumeration>>
OrderStatus

- PENDING
- PAYMENT_FAILED
- PAID
- PREPARING
- READY
- COMPLETED
- CANCELLED

<<enumeration>>
PaymentStatus

- PENDING
- SUCCESS
- FAILED

<<enumeration>>
PaymentProvider

- MOCK
- VNPAY
- ZERO_AMOUNT

<<enumeration>>
PaymentReconciliationState

- NONE
- SCHEDULED
- RESOLVED
- REQUIRES_REVIEW

<<enumeration>>
PaymentGatewayDisposition

- OBSERVED
- FINALIZED
- DUPLICATE
- CONFLICT
- FINANCIAL_EXCEPTION

<<enumeration>>
RedemptionStatus

- HELD
- CONSUMED
- RELEASED

<<enumeration>>
CouponType

- PERCENT
- FIXED

<<enumeration>>
PaymentMethod

- CARD
- WALLET

<<enumeration>>
DrinkSize

- S
- M
- L
- ONE_SIZE

<<enumeration>>
ProductSizePolicy

- STANDARD
- ONE_SIZE

<<enumeration>>
PaymentGatewaySource

- IPN
- QUERYDR

<<enumeration>>
PaymentGatewayOutcome

- UNKNOWN
- SUCCESS
- FAILED

<<value object / order-time values>>
ToppingSnapshot

- code: String
- name: String
- priceVnd: MoneyVnd

OrderItem owns 0..3 ToppingSnapshot values; names and prices remain unchanged after checkout.

Snapshot mapping: toppingCodeSnapshot, toppingNameSnapshot, toppingPriceSnapshotVnd.

MoneyVnd = integer VND (BigInt internally); DateTime = timezone-aware instant; [0..1] = optional.

GRACE is a time window. EXPIRED is a failure reason. Neither is an OrderStatus or PaymentStatus.

Payment resolution is derived presentation data; REQUIRES_REVIEW belongs to reconciliation, not PaymentStatus.
